

ADMISSION OPEN**MBA (Construction Management) MBACN****About Programme**

MBA (Construction Management) is a specialized program that equips students with a blend of business acumen and insight into construction processes to enhance the career prospects. Unlike a traditional MBA, which covers broad business management concepts, MBA (Construction Management) focusses on comprehensive knowledge and skills needed to succeed in the construction industry. The programme aims to enhance profitability through construction management techniques and improve the socio-economic condition of stakeholders by inculcation of Construction Management practices.

ADMISSION OPEN

MBA (Logistics & Supply Chain Management) : MBALS

About Programme

A New Programme, MBALS is intended to enhance the career prospects of learners/students; and make the nation more aware about Logistics and Supply Chain Management. An MBA in Logistics and Supply Chain Management is a specialized degree program designed to equip students with the knowledge and skills required to manage the flow of goods, services, and information from the point of origin to the point of consumption, therefore curriculum of MBALS has been developed accordingly, which is as per the National Education Policy, 2020.

The objectives of an MBA in Logistics and Supply Chain Management typically revolve around equipping students with the knowledge, skills, and abilities necessary to succeed in the field. The major objectives of the Programme are :

- * to cultivate strategic thinking abilities in students;
- * to gain a deep understanding of supply chain concepts, including procurement, production, distribution, and logistics;
- * to equip students with the tools and techniques to enhance operational efficiency within organizations.;and
- * to develop analytical skills, including data analysis, quantitative modeling, and decision-making;
